REST Resource: accounts.adUnits.adUnit Mappings

Page Summary

Resource: AdUnitMapping

Settings to map an AdMob ad unit to a 3rd party ad unit.

JSON representation

```
{
  "name": string,
  "adapterId": string,
  "state": enum (State (/admob/api/v1/early-access-program/reference/rest/v1alpha/accounts.adUnits.adUnitMappings#State)) {
    STATE_UNSPECIFIED = 0,
    ...
  },
  "adUnitConfigurations": {
    string: string,
    ...
  },
  "displayName": string
}
```

Fields

name	string
	Resource name of this ad unit mapping.
	Format is: accounts/{publisherId}/adUnits/{ad_unit_id_fragment}/adUnitMappings/{adUnitMappingId} Example: accounts/pub-1234567890123456/adUnits/0123456789/adUnitMappings/987654321
adapterId	string (int64 format)
	The ID of mediation ad source adapter used by this ad unit mapping.

Fields

	The adapter determines the information needed in the ad_network_settings.
state	enum (<u>State</u> (/admob/api/v1/early-access-program/reference/rest/v1alpha/accounts.adUnits.adUnitMappings#State)) Output only. The status of this ad unit mapping.
adUnitConfigurations	map (key: string (<u>int64</u> (https://developers.google.com/discovery/v1/type-format) format), value: string) Settings for the specified ad unit to make an ad request to 3rd party ad network. Key-value pairs with values set by the user for the keys requested by the ad network. Please see https://support.google.com/admob/answer/3245073 (https://support.google.com/admob/answer/3245073) for details on how to configure the network settings. An object containing a list of "key": value pairs. Example: { "name": "wrench", "mass": "1.3kg", "count": "3" }.
displayName	string Optional. The display name of this ad unit mapping instance.

State

Status of the ad unit mapping. Newly created ad unit mapping is set to ENABLED.

Output only.

Enums

STATE_UNSPECIFIED	The default value.
ENABLED	The ad unit mapping is active and used to serve ads or collecting stats.

Methods

create Create an ad unit mapping under the specific AdMob account and ad unit.
(/admob/api/v1/early-access-program/reference/rest/v1alpha/accounts.adUnits.adUnitMappings/create)

list List ad unit mappings under the specified AdMob account and ad unit.
(/admob/api/v1/early-access-program/reference/rest/v1alpha/accounts.adUnits.adUnitMappings/list)
